

How to install CrimeBlocker on your computers

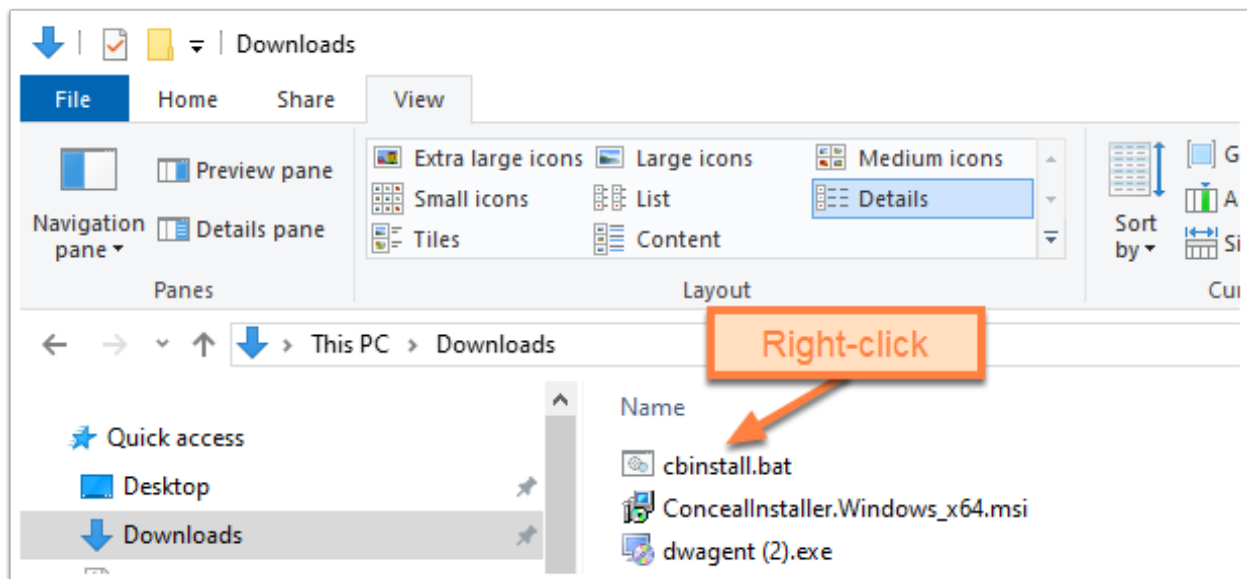

Prepare to Launch the Installer File

The **CrimeBlocker** partners with our supplier, Conceal Inc., to protect you from ransomware, viruses and other threats.

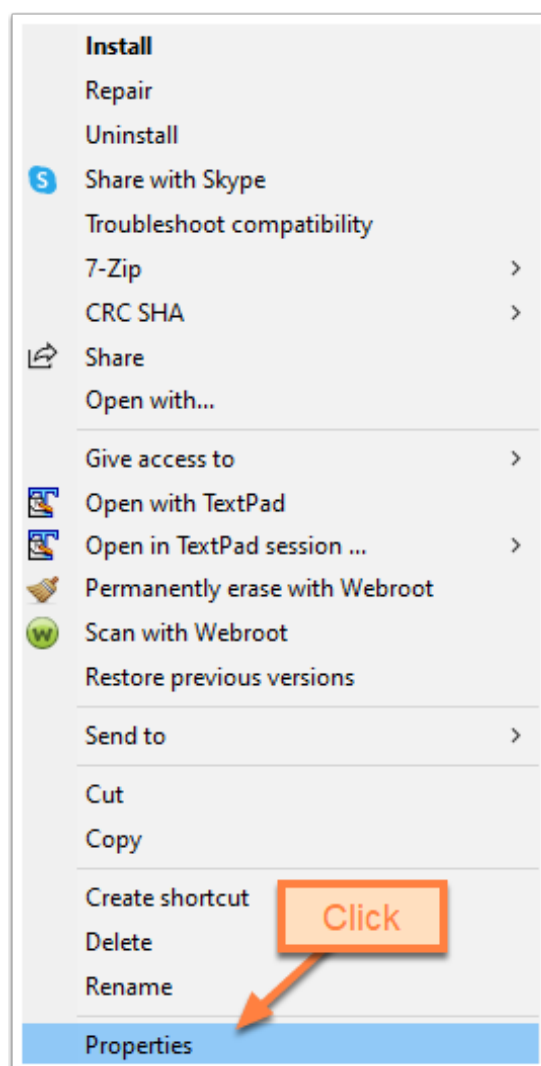

To install **CrimeBlocker**, copy **cbinstall.bat** and **ConcealInstaller.Windows_x64.msi** to a folder on the computer, such as **Download**.

These two files were given to you or are available from a link in your new customer email.

Right-click **cbinstall** or **cbinstall.bat** - Please **do not double-click** on the **ConcealInstaller.Windows_x64** file.

Click Properties

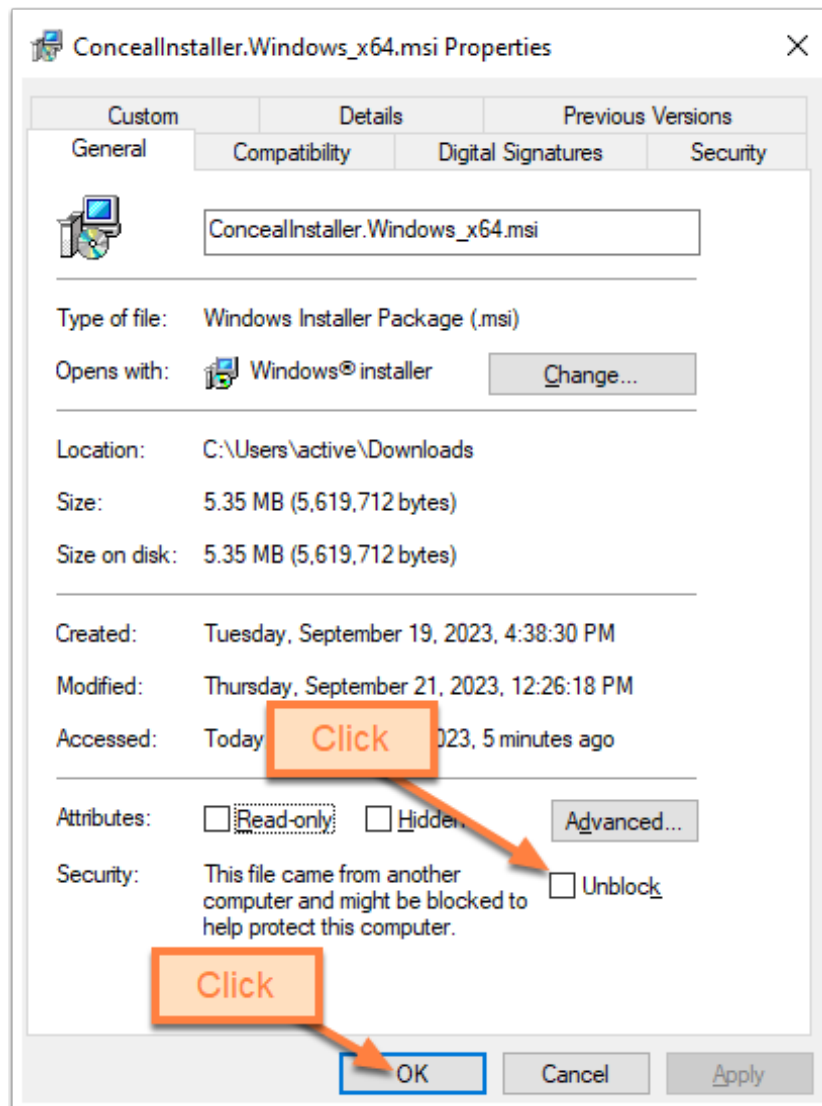

Unblock the Installer

The installer may or may not show the **Unblock** checkbox. If it does:

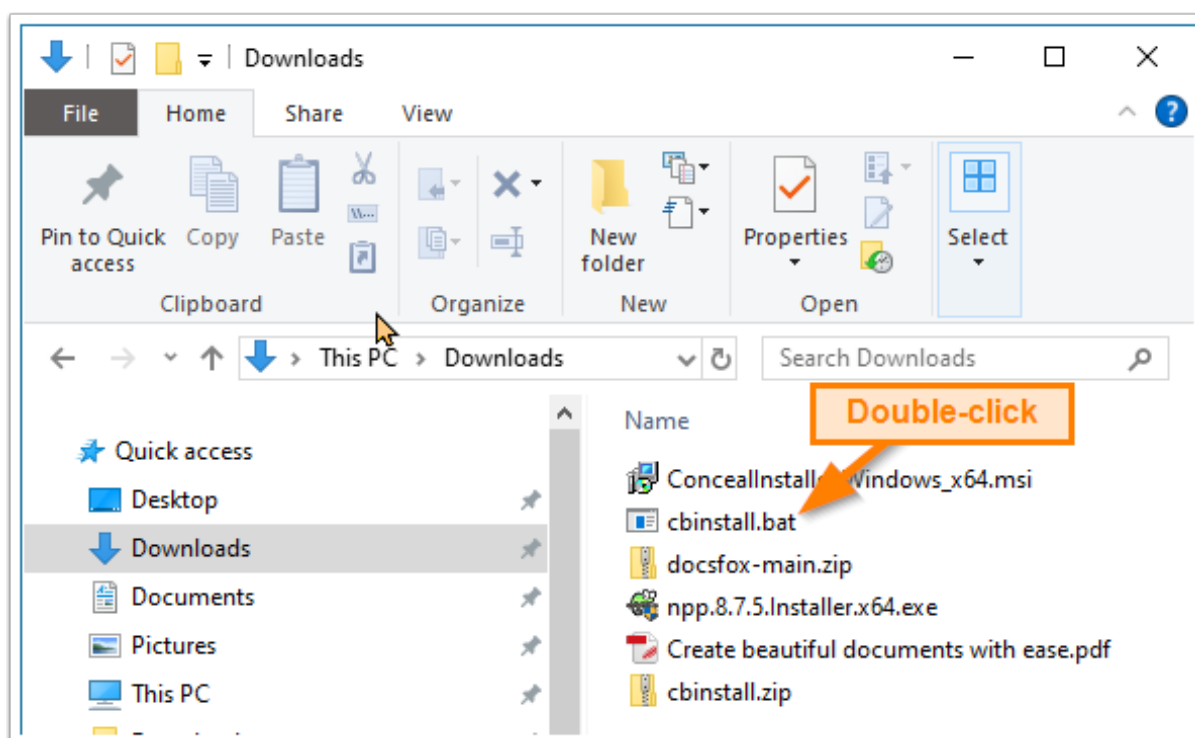

Click the box: **Unblock**

Click **OK**

Note: If afterwards you copy the installer anywhere else, you likely don't need to unblock it again.

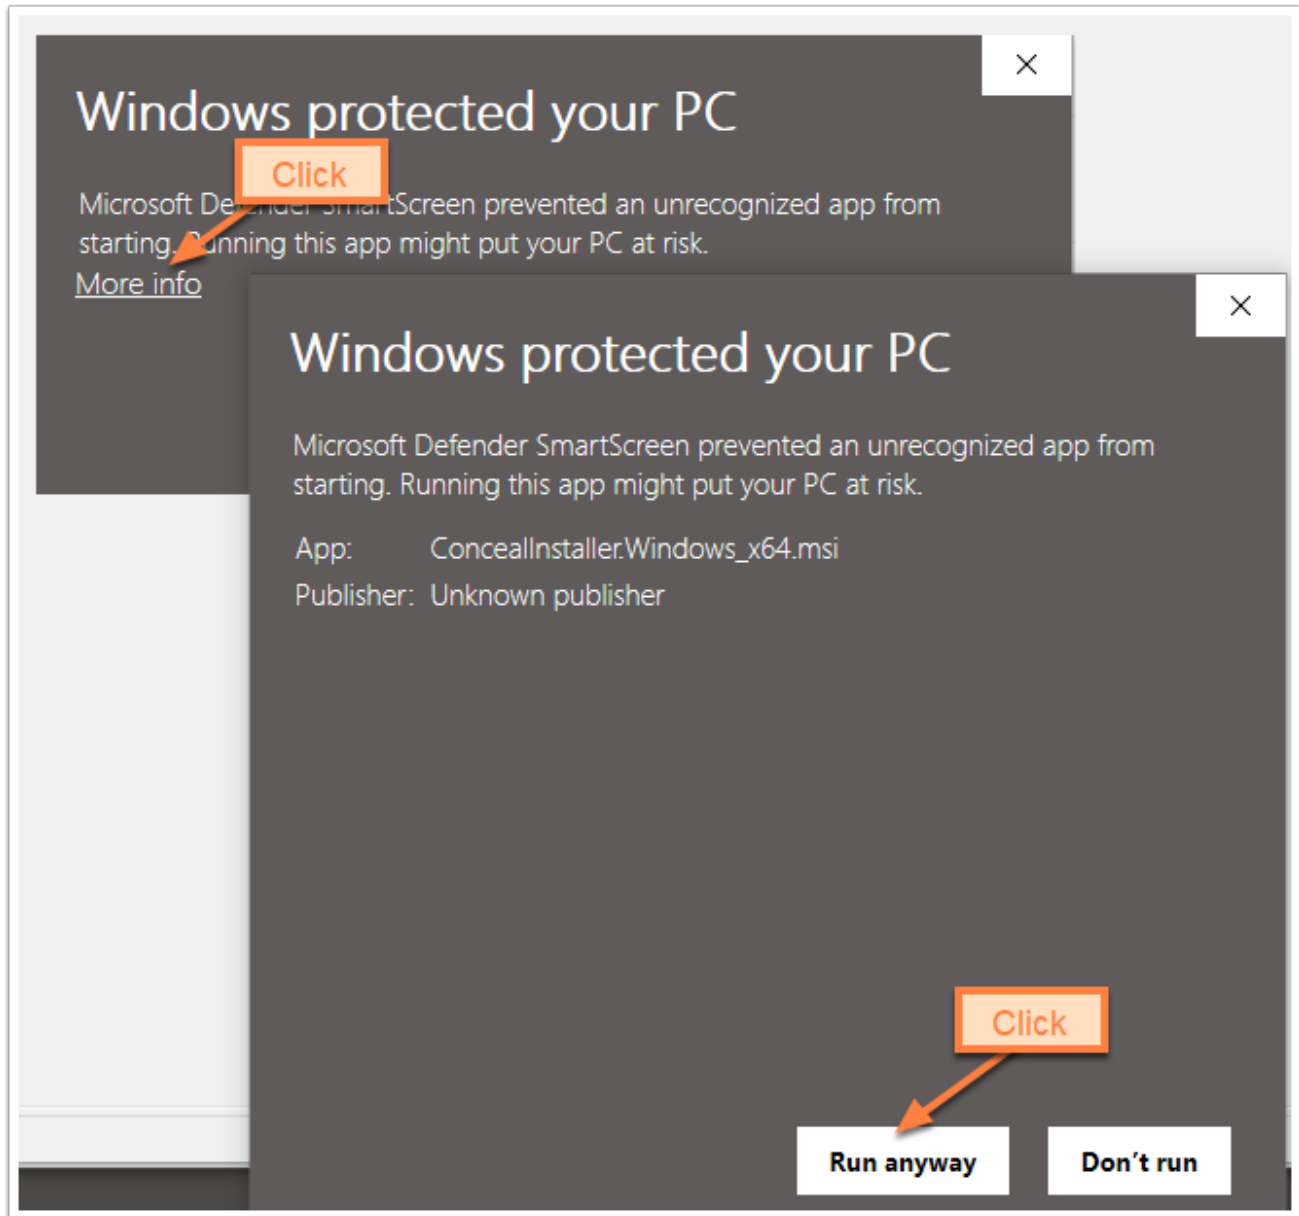

Double-click cbinstall.bat

Run Anyway

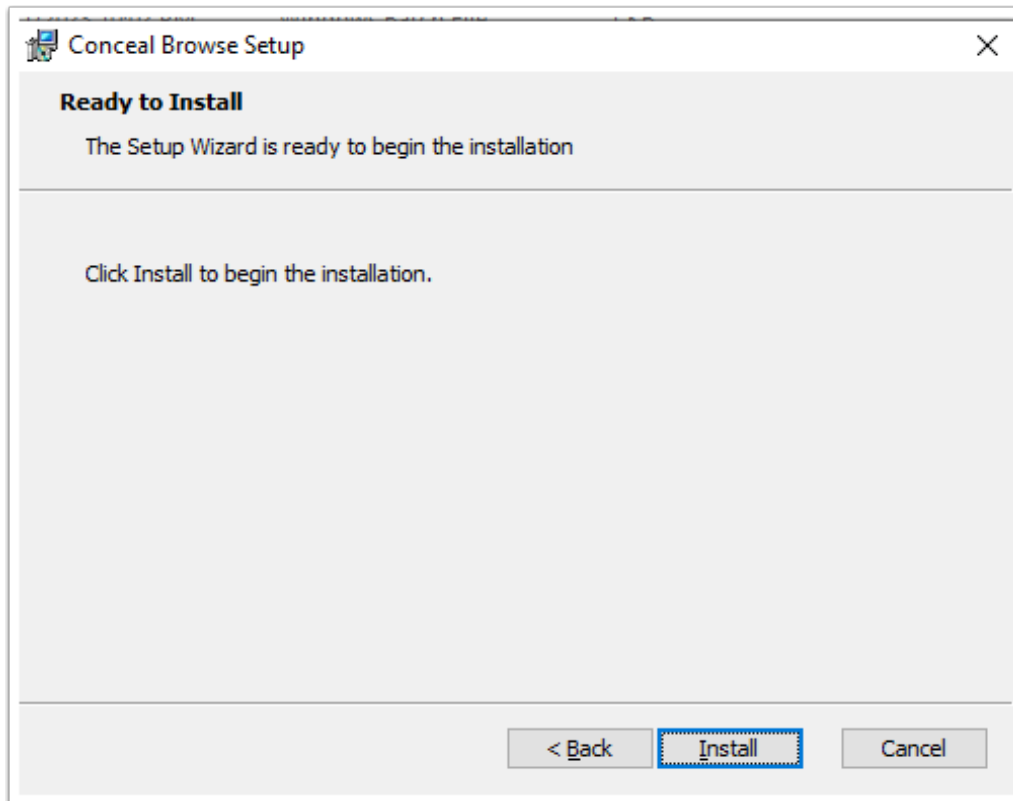

If the Windows warning appears, click **More info** and then **Run anyway**

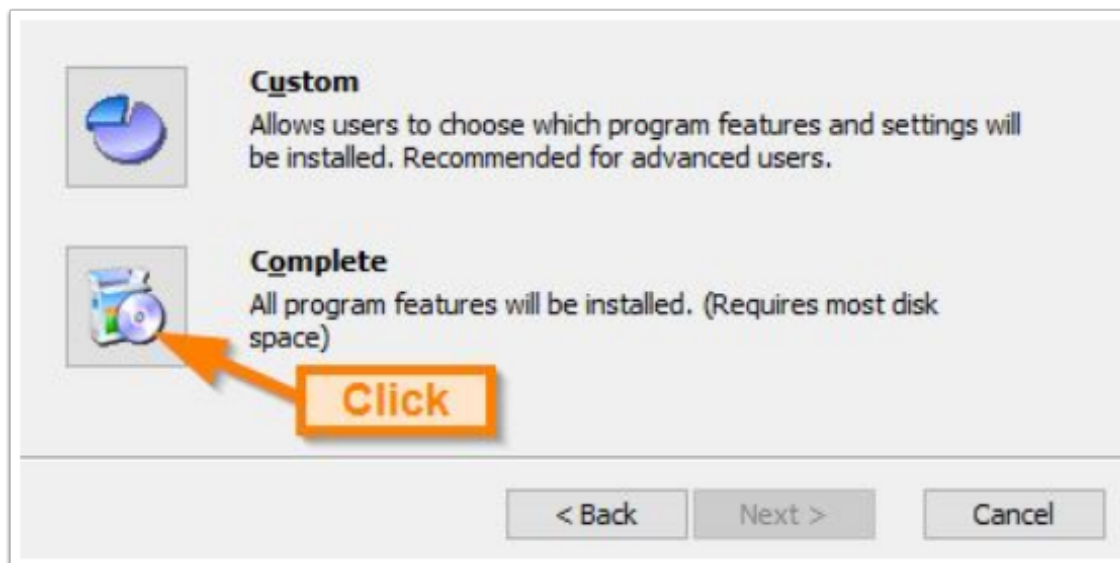

Click Install

Click **Install**

Click **Yes** at the User Account Control screen that asks, "Do you want to allow..."

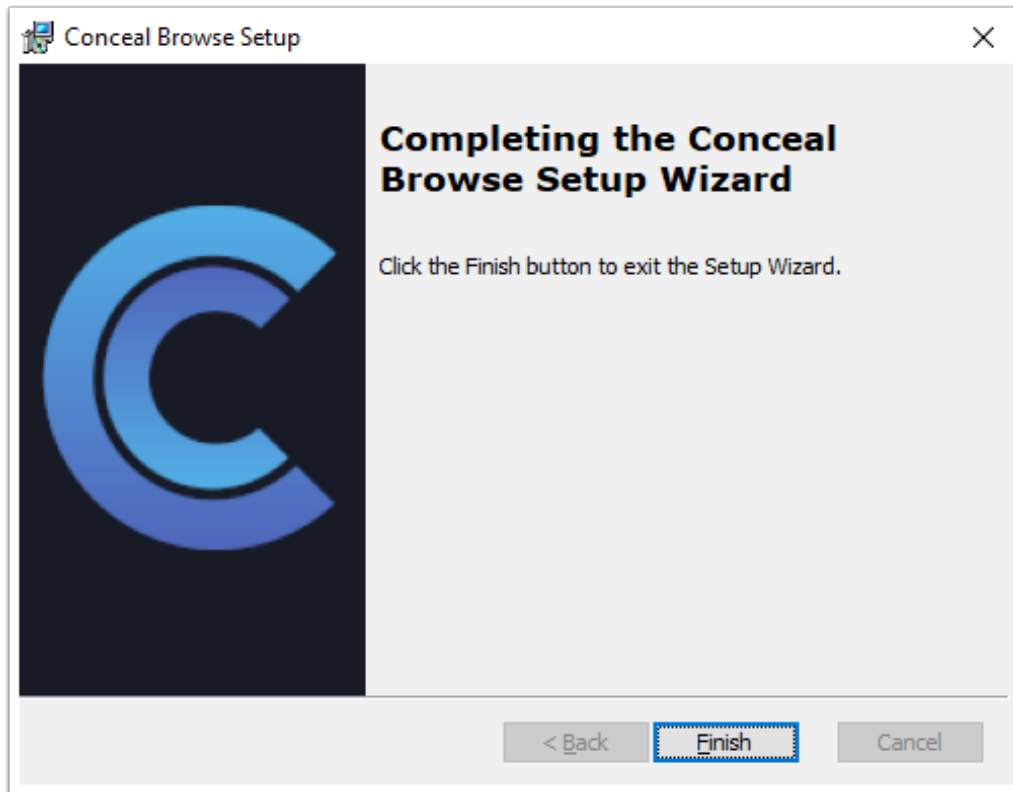

Click the Complete icon

Click Finish

Click **Finish** and you are done!

The next step shows how to check the installation.

Hide the CrimeBlocker Overlay

Close and reopen your web browser. It may take a few seconds for the CrimeBlocker icon to appear.

Check to see that the CrimeBlocker icon shows in the top bar of the web browser as shown in 1., below.

Note: If the icon appears without the green "ON" symbol, the installation failed.

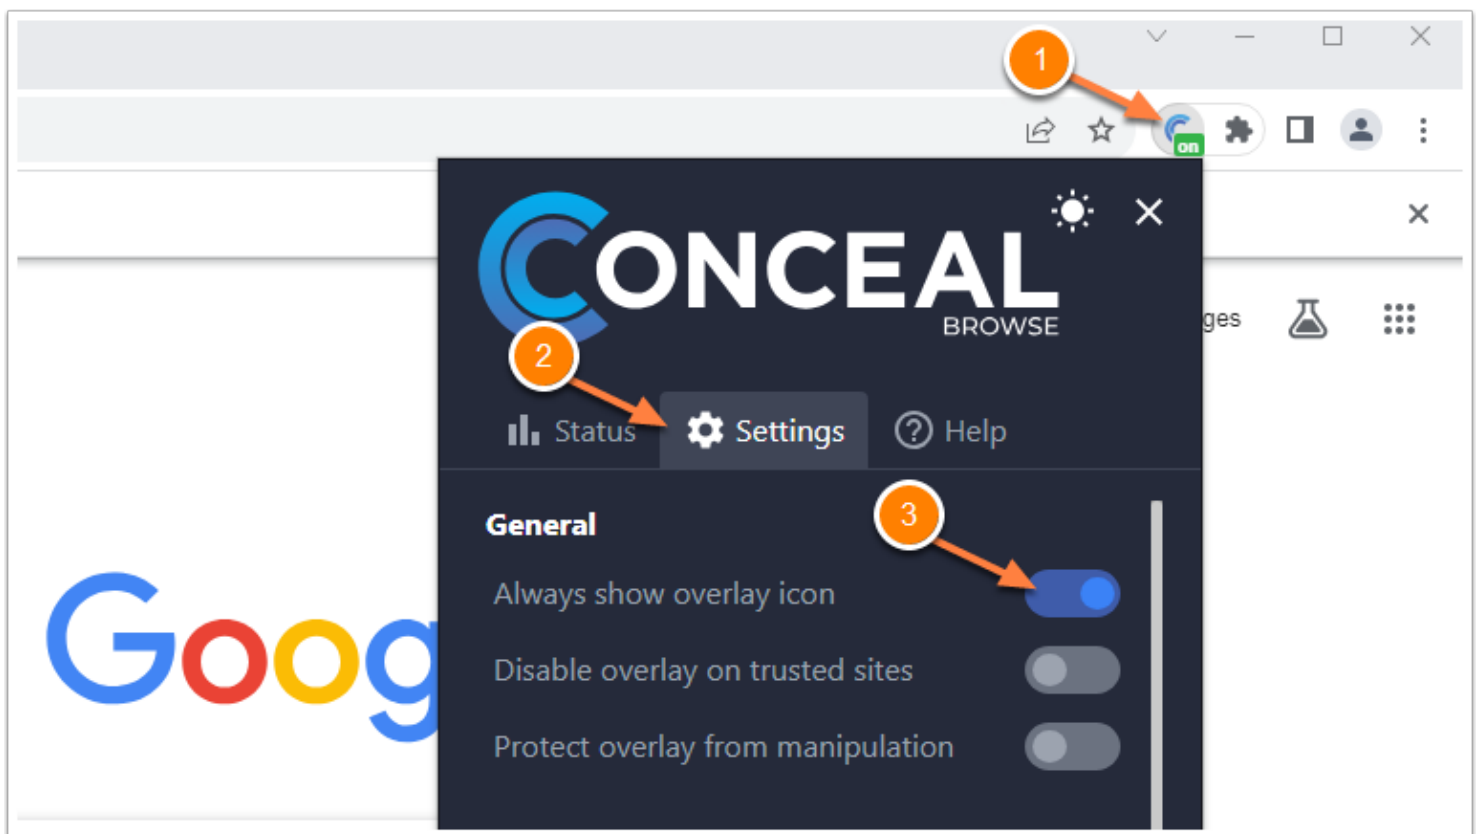

To start over, uninstall the program named ConcealBrowse using Windows Add/Remove programs. Then reinstall.

How to Hide the Overlay Icon

CrimeBlocker may place a "C" overlay icon in the lower left area of your browser.

To hide this icon, open your browser and:

1. Click on the CrimeBlocker top bar icon.
2. Click on the **Settings** tab.
3. Click on the toggle button to switch it from blue to gray.

For More Information

See the CrimeBlocker User Guide for more information about using CrimeBlocker.

It is available from the Help menu of our website: <https://securemyfirm.com>
