

Huntress Installation Guide

Likely you already have the two installation files you need in the folder C:\Backup on your computer or server.

If not, let us know and we will give you the download links for them.

1. You start with two files in same folder: huntress.bat and HuntressInstaller.exe. Open the folder, usually C:\Backup
2. DO NOT double-click on HuntressInstaller.exe.
3. Double-click on huntress.bat
4. You may see a message: "Windows protected your PC... More info ... Don't Run" Click on: "More Info. Click: Run Anyway"
5. Allow this app to make changes to your device.

That's it! Your computer will be protected immediately.

You are much safer with Huntress Guard Dogs on all your computers!
